LAPORAN DIREKSI

Atas nama Direksi, dengan senang hati kami menyampaikan hasil usaha serta laporan keuangan PT Lionmesh Prima Tbk untuk tahun buku yang berakhir pada tanggal 31 Desember 2005.

HASIL USAHA

Total penjualan Perseroan mengalami peningkatan sebesar 16,77%, dari Rp. 89,24 miliar di tahun 2004 menjadi Rp. 104,20 miliar. Peningkatan ini berkaitan dengan harga penjualan dan volume penjualan yang lebih baik dari tahun sebelumnya.

Laba usaha Perseroan mengalami penurunan menjadi Rp. 7,33 miliar, atau menurun 20,14% dari periode sebelumnya yang berjumlah Rp. 9,18 miliar. Fenomena ini merupakan indikasi dari ketidak stabilan harga penjualan baja di pasaran dalam negeri maupun luar negeri.

Lebih dari itu, Perseroan memperoleh laba bersih setelah pajak sebesar Rp. 4,11 miliar, atau penurunan sebesar 25,40% dari Rp. 5,51 miliar di tahun 2004.

Jumlah aktiva Perseroan pada tanggal 31 Desember 2005 mencapai Rp. 42,15 miliar, menurun sebesar 1,41 % dari tahun sebelumnya.

IKLIM EKONOMI

Pertumbuhan ekonomi tahun 2005 tidak sebaik prakiraan semula, dan hanya tumbuh sebesar 5,6 %. Melambatnya pertumbuhan ekonomi Indonesia bersumber pada sisi produksi nasional yang mengalami penurunan dan melemahnya daya beli masyarakat, serta dibebani pula oleh meningkatnya biaya produksi. Kondisi perekonomian ini merupakan dampak dari melemahnya nilai tukar Rupiah dan meningkatnya harga minyak internasional yang berkelanjutan. Diiringi dengan peningkatan ekspektasi inflasi masyarakat serta kecenderungan melemahnya konsumsi dan investasi. Sementara kinerja ekspor melambat seiring dengan permintaan dunia dan lemahnya daya saing ekspor Indonesia. Oleh karena itu, Bank Indonesia mengambil langkah pengetatan moneter sejak awal triwulan III - 2005, kemudian secara bertahap menaikkan tingkat suku bunga kebijakannya.

BOARD OF DIRECTORS' REPORT

On behalf of the Board of Directors, I am pleased to present the operational review and financial report of PT Lionmesh Prima Tbk for the fiscal year 2005.

OPERATIONAL REVIEW

Turnover for the Company increased by 16.77% from Rp. 89.24 billion in fiscal year 2004 to Rp. 104.20 billion. The increase was mainly attributed to higher selling price and sales volumes compared to the previous fiscal year.

The Company's operating income declined to Rp. 7.33 billion or a decrease of 20.14% from Rp. 9.18 billion in the previous reporting period. This is due to fluctuating domestic and international steel prices.

Hence, the Company only enjoyed an after tax net income of Rp. 4.11 billion or a decrease of 25.40% from Rp. 5.51 billion in fiscal year 2004.

Total assets as at December 31, 2005 was Rp. 42.15 billion, a decrease of 1.41% from the previous year.

ECONOMIC OUTLOOK

In the year 2005, the growth of the economy was only 5.6%. The slow growth rate was due to the decline in the national production rate, weakening purchasing power and increase in the cost of production. This can be attributed to the low Rupiah exchange rate and the continual increase in global oil prices, along with the rise in the public's inflation expectation and the propensity towards reduced consumption and investment. Meanwhile, the export sector also slowed down due to the lower global demand and the reduced export competitiveness of Indonesia. As a result, Bank Indonesia imposed tighter monetary policy since the third quarter of the year, and then gradually increase interest rates.

Dengan kondisi eksternal yang kurang kondusif, serta timbulnya faktor-faktor penyebab instabilitas makro ekonomi, maka diperkirakan laju pertumbuhan ekonomi Indonesia pada tahun 2006 akan sedikit melambat, dan berada pada kisaran 5,5 % - 6%. Beberapa faktor yang dapat memperlambat laju pertumbuhan ini antara lain, penurunan volume perdagangan dunia, meningkatnya suku bunga internasional sebagai dampak kebijakan moneter ketat yang ditempuh oleh beberapa bank sentral dunia, dan kenaikan harga BBM.

Untuk mengantisipasi, Pemerintah akan terus melakukan perbaikan iklim investasi dengan mempercepat pembangunan infrastruktur, deregulasi ekonomi, penghapusan hambatan birokrasi, revisi peraturan ketenagakerjaan, dan perbaikan administrasi perpajakan, serta meningkatkan kegiatan perdagangan luar negeri.

INDUSTRI BAJA

Penurunan kebutuhan baja di pasaran internasional diperkirakan akan mempengaruhi industri baja nasional di tahun 2006. Masuknya produk baja impor, terutama produk yang harganya jauh lebih murah dibandingkan dengan harga produk baja dalam negeri, dipastikan akan melemahkan industri nasional, khususnya industri baja yang masih lemah akibat kurang stabilnya kondisi perekonomian dalam negeri.

Tantangan terbesar yang akan dihadapi oleh industri baja dunia di tahun 2006 adalah negara-negara maju produsen baja yang cenderung memiliki pasar di negara-negara berkembang, seperti Indonesia. Dimana negara-negara maju ini menerapkan sistem harga dumping dalam perdagangan. Jika hal ini terjadi, maka perdagangan baja di dalam negeri pun menjadi tidak sehat, karena Indonesia akan dibanjiri produk baja impor.

Untuk mengatasi ancaman dari serbuan produk baja impor murah, Pemerintah diharapkan dapat mengeluarkan suatu kebijakan yang dapat mencegah masuknya produk baja impor murah ke Indonesia.

With unfavorable external conditions and factors causing instability in the macro economy, the growth rate of the economy in Indonesia in year 2006 is predicted to be slow approximately 5.5% - 6% due to several factors which include decrease in global trade volume, increase in international interest rates as a result of tighter monetary policies imposed by several world's central banks and the rise in fuel prices.

To anticipate this, the government will continue to improve the investment climate by accelerating infrastructure development, economic deregulation, loosening of bureaucratic restrictions, revision of labor regulations, improving tax administration, as well as increasing overseas trade activities.

STEEL MARKET OUTLOOK

The decrease in steel demand in the international markets will significantly affect the national steel industry in 2006. The influx of imported steel products, especially those at lower prices, will most probably weaken our national industry, in particular the steel industry which is still weak due to the fragile condition of the country's economy.

The greatest challenge that the steel industry will face in the year 2006 is from the steel producers of the developed countries who wish to have larger market share in developing countries such as Indonesia. They will resort to the practice of "price dumping" and this will cause the domestic steel market to be difficult, as Indonesia will be flooded with large quantities of imported steel products.

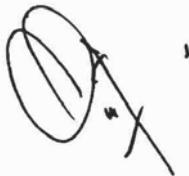

To overcome the threat of low price imports, we hope that the government will set a policy to prevent the large influx of cheap, imported steel products into Indonesia.

PENUTUP

Akhir kata, kami mengucapkan terima kasih kepada jajaran manajemen dan karyawan atas prestasi dan kontribusinya. Tak lupa juga kami berterima kasih kepada para pelanggan, pemasok, pemegang saham, rekan bisnis dan semua pihak yang senantiasa memberikan dukungan kepada Perseroan.

FINANCIAL REVIEW

NET SALES

Net sales for year 2005 was Rp. 104.20 billion or increased by 16.81% compared to Rp. 89.24 billion in 2004. This was mainly due to sales volume, and average selling prices being higher compared to year 2004.

OPERATING INCOME

Operating income for the year 2005 was Rp. 7.33 billion or decreased by 20.14% compared to 2004 results of Rp. 9.18 billion. The decrease in the Company's operating income in year 2005 was mainly due to the absence of windfall gain from raw material prices, as in the previous year.

The decrease in net income in year 2005 was due mainly to the decline in sales margin, resulting in a drop in gross profits amounting to Rp. 0.84 billion and increase in general and administrative expenses.

TOTAL ASSETS AND EQUITY

Total assets as at December 31, 2005 was Rp. 42.15 billion, or decreased by 1.41% compared to Rp. 42.75 billion as at December 31, 2004. This was due to the decrease in fixed assets amounting to Rp. 0.99 billion, and higher depreciation expenses compared to the addition of fixed assets.

PEMASARAN

Sesuai dengan jenis produk Perseroan untuk industri bidang properti, maka Perseroan mengutamakan dukungan pemasaran melalui metode pendekatan langsung kepada kelompok pemakai seperti konsultan bangunan, pemborong dan pemilik proyek dengan memberikan penjelasan dan dasar-dasar perhitungan konversi dari sistem konvensional (besi beton batangan) ke sistem jaring kawat baja las yang memang terbukti cukup efisien, efektif dan ekonomis, serta melakukan supervisi ke lapangan bila diperlukan. Selain itu Perseroan juga mengadakan seminar dan pamer-pameran. Dengan metode-metode pemasaran ini diharapkan tercapainya kerja sama yang efektif sehingga penjualan Perseroan senantiasa meningkat.

Selain mengadakan pendekatan langsung ke konsumen, Perseroan juga melakukan kerja sama dengan distributor-distributor di Indonesia untuk memasarkan hasil produk Perseroan. Dengan demikian Perseroan memiliki pangsa pasar yang cukup luas di dalam negeri.

MARKETING

As our products are intended for the property sector, the Company emphasizes on the direct approach method to users such as construction consultants, contractors, and developers. Calculations and explanations on the conversion of conventional concrete round bars to welded wire mesh are provided to assist the users. The use of welded wire mesh has been proven to be efficient, effective, and economical. On-site supervision is conducted if necessary. Besides, the Company also organizes seminars and actively participates in exhibitions. Through these approaches, we have achieved effective market penetration.

In addition, the Company also appoints distributors throughout Indonesia to distribute its products and increase the Company's market share.

PROSPEK USAHA

Tingkat pertumbuhan ekonomi Indonesia yang masih relatif rendah di tahun 2005 akan menambah panjang deretan tantangan berat yang akan menghadang seluruh sektor perekonomian di Indonesia pada tahun 2006. Inflasi diperkirakan akan terus meningkat, akibatnya suku bunga akan tetap tinggi dan pembiayaan usaha pun tersendat. Selain itu, harga minyak yang masih belum stabil dan rencana kenaikan Tarif Dasar Listrik (TDL) akan semakin memperlemah kondisi dunia usaha, khususnya industri properti dan konstruksi.

Perkembangan Perseroan berhubungan erat dengan pertumbuhan industri konstruksi dan properti, yang tergolong sensitif terhadap kondisi ekonomi, khususnya terhadap tingkat suku bunga. Walaupun demikian, Perseroan akan tetap semangat untuk menghadapi dan menjalani usahanya di tahun 2006, dan tetap optimis bahwa di tahun 2006 industri properti dan konstruksi masih akan tumbuh, meskipun tingkat pertumbuhannya lebih lambat dari tahun sebelumnya. Pembangunan infrastruktur serta berbagai sarana dan prasarana kepentingan publik diharapkan dapat menjadi stimulus penggerak pertumbuhan tersebut.

BUSINESS PROSPECTS

The growth rate of Indonesian economy in 2005 is still relatively low and this will present a host of great challenges to our economy in year 2006. It is predicted that Inflation will continue to rise resulting in higher interest rates and insufficient trade financing. Besides, the fluctuating oil prices and the upcoming increase in electricity tariff will further weaken business conditions, especially the property and construction industries.

The company's growth is closely related to the growth in the construction and property industries which are very sensitive towards changes in the economy, especially interest rate. Nevertheless, the Company is optimistic that the property and construction industries will continue to flourish and grow even though the rate will not be as high as in the previous years. The development of infrastructure and various public facilities are expected to be the impetus that will drive Indonesia's economy in the near future.

PENGENDALIAN MUTU

Pengendalian mutu adalah merupakan komitmen Perseroan, karena mutu adalah salah satu strategi utama Perseroan dalam memberikan kepuasan kepada pelanggan. Untuk tetap dapat mempertahankan dan meningkatkan mutu hasil produksi Perseroan, selain dilakukan pengujian-pengujian secara berkala dengan peralatan yang mutakhir, Perseroan juga selalu mendapatkan informasi teknis dari luar negeri, seperti Jerman dan Swiss dalam rangka meningkatkan kemampuan sumber daya manusia dengan memberikan pengarahan khusus di bidang teknik, proses produksi dan kualitas.

QUALITY CONTROL

The Company is committed to continuously improve the quality of its products. The emphasis on quality has always been the Company's principal strategy in providing customers' satisfaction. In order to maintain and improve product quality, the Company conducts periodical testing on its products using sophisticated equipment. The Company also sources various technical information from other countries like Germany and Switzerland with the view of upgrading the skills of its employees with particular emphasis on technical, production process and quality areas.

ANALISIS MENGENAI DAMPAK LINGKUNGAN

Industri ini secara keseluruhan tidak membahayakan dan tidak mempunyai dampak penting terhadap lingkungan sekitarnya, karena dalam proses produksi yang dilakukan Perseroan, tidak menggunakan Bahan Beracun dan Berbahaya (B3) namun hanya menghasilkan limbah padat berupa potongan kawat baja yang dikumpulkan untuk didaur ulang.

Meskipun secara keseluruhan proses produksi Perseroan tidak mempunyai dampak penting terhadap lingkungan, Perseroan dengan penuh tanggung jawab telah melaksanakan kewajiban yang diatur dengan SK Menteri Perindustrian No. 138/M/SK/1991 yaitu dengan menyusun dokumen AMDAL yang berbentuk Upaya Pengelolaan Lingkungan dan Upaya Pemantauan Lingkungan (UKL dan UPL), sesuai dengan Surat Tanggapan Kepala Bidang Wilayah Industri dan Pengendalian Dampak No. 153/UKPL/Bd/P3/XI/1995 tanggal 24 Nopember 1995.

Dalam menyusun dokumen-dokumen tersebut di atas, Perseroan bekerja sama dengan konsultan **AMDAL**.

ENVIRONMENTAL IMPACT ANALYSIS

Generally, the welded wire mesh industry is neither hazardous nor produces harmful materials to the surrounding environment because there are no toxic or hazardous substances released in the production process. The only solid waste produced is recyclable steel wire cuttings.

Even though the overall production process does not have a negative impact on environment, the Company has taken the initiative to prepare an AMDAL (An Environment Impact Analysis) Report as regulated by the Decree of the Minister of Industry No. 138/M/SK/1991. The report contents cover environmental analysis, management and monitoring effort as regulated by the Letter from the Area Head of Industrial and Environment Control No. 153/UKPL/Bd/P3/XI/1995 dated November 24, 1995.

In preparing the reports, the Company worked with an **AMDAL** consultant.

PENYEDIAAN BAHAN BAKU

Sesuai dengan jenis produk Perseroan, yaitu jaring kawat baja las, maka Perseroan menggunakan bahan baku utama berupa batang kawat baja yang diperoleh dari beberapa pemasok dalam negeri, antara lain adalah PT Krakatau Steel, yang dilakukan berdasarkan kontrak pembelian secara teratur dan terencana. Hal ini juga dilakukan dengan para pemasok lainnya. Dengan demikian Perseroan berkeyakinan kelangsungan penyediaan bahan baku dalam jumlah yang cukup dan kualitas yang sesuai dengan kebutuhan dapat terjamin.

TATA KELOLA PERUSAHAAN

Direksi memiliki komitmen tinggi dalam menerapkan dan melaksanakan Tata Kelola Perusahaan yang baik/Good Corporate Governance ("GCG") secara konsisten, sesuai dengan pedoman tentang "GCG" yang dianjurkan oleh Bapepam dan PT Bursa Efek Jakarta. Selaras dengan kode etik "GCG", Perseroan telah memulai penerapan prinsip-prinsip dasar "GCG", yaitu mencakup pengelolaan Perseroan berdasarkan keterbukaan, akuntabilitas, pertanggungjawaban, kemandirian, serta kesetaraan dan kewajaran. Untuk menunjang penerapan dan pelaksanaan "GCG" tersebut, maka Perseroan telah melakukan pengangkatan Komisaris Independen, Sekretaris Perusahaan dan pembentukan Komite Audit.

PERANAN DIREKSI

Oleh karena itu dalam setiap Pertemuan Direksi akan membahas, menyetujui, serta meninjau seluruh perencanaan dan strategi menyangkut masalah-masalah operasional, keuangan, investasi, serta pembiayaan. Selain itu, Direksi juga akan meninjau manajemen eksekutif, dan memastikan strategi yang dilakukan selalu untuk kepentingan Perseroan dan para pemegang saham.

RAW MATERIALS

The Company utilizes steel wire rods as the main raw material to produce wire mesh. The raw materials are acquired from several domestic suppliers, among others PT Krakatau Steel, with whom the Company has made purchase contract arrangements. Similar arrangements are also made with other suppliers so that the Company can be assured a continuous supply of raw materials in sufficient quantity and quality.

CORPORATE GOVERNANCE

The Board of Directors is committed to implement good corporate governance practices, in compliance with the Good Corporate Governance Guidelines issued by Capital Market Supervisory Agency and Jakarta Stock Exchange. To fulfill the code of ethics of good corporate governance, the Company had adopted the basic principles of good corporate governance, including transparency, accountability, independency, equity and norm. STUKTUR ORGANISASI

STRUCTURE OF ORGANIZATION

RISIKO USAHA

Sebagaimana biasanya kegiatan yang dilakukan oleh perusahaan lain, maka usaha yang dilakukan oleh Perseroan juga tak lepas dari adanya risiko yang dapat disebabkan oleh beberapa faktor di bawah ini:

POLITIK DAN SOSIAL

Risiko politik Indonesia sekarang ini dianggap tinggi oleh beberapa analis, berkaitan dengan kondisi politik dan sosial yang cenderung tidak stabil. Jika ketidakstabilan tersebut mempengaruhi perekonomian nasional, maka hal ini pun dapat berdampak negatif terhadap kinerja Perseroan.

EKONOMI

Permintaan untuk produk besi baja dipengaruhi oleh sektor industri konstruksi dan properti. Seperti sektor-sektor lainnya, pertumbuhannya juga bergantung kepada GDP.

RISK ANALYSIS

Generally, the business activities conducted by the Company are subject to the following risk factors:

POLITICAL AND SOCIAL

Currently Indonesia's political risk is considered high by analysts due to potentially unstable political and social conditions. Any disruptions to national economy caused by any instability can in turn negatively impact the Company's performance.

ECONOMIC

Demand for steel products is mainly driven by construction and property sectors. Like any other sectors, it also depends on growth of the GDP.

PERSAINGAN

Industri bahan konstruksi bangunan memang menjanjikan prospek yang baik, oleh karena itu semakin banyak perusahaan sejenis akan bermunculan dan menghasilkan produk-produk baru yang sejenis dengan produk Perseroan serta memperluas jaringan pemasaran di Indonesia. Akibatnya, persaingan ketat akan terjadi dalam industri.

FLUKTUASI NILAI TUKAR MATA UANG ASING

Sebagian pinjaman Perseroan dari bank adalah dalam bentuk mata uang asing. Fluktuasi nilai tukar rupiah terhadap mata uang asing yang drastis akan menimbulkan tambahan beban bagi Perseroan dalam pembayaran pinjaman dalam mata uang asing tersebut dan akan mempengaruhi kinerja keuangan Perseroan.

BAHAN BAKU

Dalam proses produksinya Perseroan menggunakan bahan baku berupa batang kawat baja, yang sebagian besar dipasok oleh PT Krakatau Steel. Kurangnya persediaan suplai bahan baku yang diperlukan oleh Perseroan serta meningkatnya harga bahan baku tersebut akan memberikan dampak terhadap tingkat produksi dan hasil usaha Perseroan.

COMPETITION

During the past year, the building construction materials industry had demonstrated positive results and the industry's future is quite promising. This may naturally encourage newcomers to enter the industry and introduce new products to compete against our products, and as a result, competition will be more intense.

FOREIGN EXCHANGE RATE FLUCTUATION

A portion of the Company's loans is in the form of foreign currencies. Drastic negative fluctuations of the Rupiah exchange rate against foreign currencies will cause additional burden to the Company in loan repayments and will affect the Company's financial performance.

RAW MATERIALS

In the production process, the Company utilizes steel wire rods as its main raw materials, which are mainly supplied by PT Krakatau Steel. Any disturbance in raw materials supply and/or an increase in raw materials prices will greatly impact the production output and overall Company's performance.

2. IKHTISAR KEBIJAKAN AKUNTANSI

a. Dasar Penyajian Laporan Keuangan

Laporan keuangan telah disajikan sesuai dengan prinsip akuntansi yang berlaku umum di Indonesia, yaitu Standar Akuntansi Keuangan ("PSAK") dan peraturan Badan Pengawas Pasar Modal ("BAPEPAM").

Laporan keuangan disusun berdasarkan konsep biaya perolehan, kecuali untuk persediaan yang dinyatakan sebesar nilai terendah antara biaya perolehan dan nilai realisasi bersih (the lower of cost or net realizable value) dan aktiva tetap tertentu yang telah dinilai kembali.

Laporan arus kas menyajikan informasi penerimaan dan pengeluaran kas yang dikelompokkan dalam kegiatan usaha, investasi dan pendanaan. Arus kas dari kegiatan usaha disajikan dengan menggunakan metode langsung.

Mata uang pelaporan yang digunakan dalam laporan keuangan adalah Rupiah.

b. Setara Kas

Deposito berjangka yang tidak dibatasi penggunaannya dengan jangka waktu tiga bulan atau kurang sejak tanggal penempatan diklasifikasikan sebagai "Setara Kas".

c. Penyisihan Piutang Ragu-ragu

Penyisihan piutang ragu-ragu dibentuk berdasarkan hasil penelaahan terhadap keadaan akun piutang pada akhir tahun.

d. Transaksi dengan Pihak yang Mempunyai Hubungan Istimewa

Perusahaan melakukan transaksi dengan beberapa pihak yang mempunyai hubungan istimewa sesuai dengan PSAK No. 7 mengenai "Pengungkapan Pihak-pihak yang Mempunyai Hubungan Istimewa". Transaksi signifikan dengan pihak yang mempunyai hubungan istimewa dijelaskan dalam Catatan 6.

e. Persediaan

Persediaan dinyatakan sebesar nilai yang lebih rendah antara biaya perolehan dan nilai realisasi bersih (the lower of cost or net realizable value). Biaya perolehan ditentukan dengan metode rata-rata, kecuali untuk bahan baku dan suku cadang yang harga perolehannya ditentukan dengan metode "masuk pertama, keluar pertama" ("first-in, first-out"). Penyisihan persediaan usang ditetapkan berdasarkan penelaahan keadaan fisik persediaan pada akhir tahun.

f. Aktiva Tetap

Aktiva tetap dinyatakan sebesar harga perolehan, kecuali untuk aktiva tertentu yang dinilai kembali pada tahun 1986 sesuai dengan peraturan Pemerintah, dikurangi akumulasi penyusutan. Penyusutan dihitung dengan menggunakan metode garis lurus (straight-line method) berdasarkan taksiran masa manfaat ekonomis aktiva tetap sebagai berikut:

CATATAN ATAS LAPORAN KEUANGAN
Tahun yang berakhir pada tanggal-tanggal 31 Desember 2005 dan 2004

2. IKHTISAR KEBIJAKAN AKUNTANSI (lanjutan)

f. Aktiva Tetap (lanjutan)

| | Tahun |
|--------------------|--------------|
| Bangunan | 20 |
| Mesin | 20 |
| Peralatan pabrik | 15 |
| Instalasi listrik | 20 |
| Kendaraan bermotor | 5 |
| Peralatan kantor | 5 |

Tanah (termasuk tanah yang tidak digunakan dalam usaha) dicatat sebesar harga perolehan dan tidak diamortisasi.

Beban pemeliharaan dan perbaikan dibebankan pada laporan laba rugi pada saat terjadinya; pemugaran dan penambahan dalam jumlah besar dikapitalisasi. Aktiva tetap yang sudah tidak dipergunakan lagi atau yang dijual, biaya perolehan dan akumulasi penyusutan dikeluarkan dari kelompok aktiva tetap yang bersangkutan dan laba atau rugi yang terjadi dilaporkan dalam laporan laba rugi tahun yang bersangkutan.

Perusahaan melakukan penelaahan untuk menentukan kemungkinan terjadinya penurunan nilai aktiva pada tanggal neraca. Apabila terdapat indikasi penurunan nilai aktiva, Perusahaan menaksir jumlah yang dapat diperoleh kembali (recoverable amount) dari aktiva tersebut. Penurunan nilai aktiva diakui sebagai beban pada usaha tahun berjalan.

g. Sewa Guna Usaha

Transaksi sewa guna usaha digolongkan sebagai sewa guna usaha dengan hak opsi (capital lease) apabila memenuhi kriteria yang dipersyaratkan sesuai dengan PSAK No. 30. Jika kriteria tersebut tidak terpenuhi, maka transaksi sewa guna usaha dikelompokkan sebagai transaksi sewa menyewa biasa (operating lease). Aktiva sewa guna usaha dengan hak opsi (disajikan sebagai bagian dalam Aktiva Tetap) dinyatakan sebesar nilai tunai dari seluruh pembayaran sewa guna usaha selama masa sewa guna usaha ditambah nilai sisa (harga opsi) yang harus dibayar pada akhir masa sewa guna usaha.

Penyusutan dihitung dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomis yang sama dengan yang diterapkan untuk aktiva tetap yang bersangkutan. Laba atau rugi yang terjadi akibat transaksi penjualan dan penyewaan kembali ("sale-and-leaseback") ditangguhkan dan diamortisasi selama sisa masa manfaat aktiva sewa guna usaha yang bersangkutan dengan metode garis lurus.

h. Pengakuan Penghasilan dan Beban

Penghasilan dari penjualan diakui pada saat penyerahan barang kepada pelanggan. Uang muka yang diterima dari pelanggan dicatat pada akun "Uang muka pelanggan". Beban diakui pada saat terjadinya.

Pada tanggal neraca, aktiva dan kewajiban moneter dalam mata uang asing disesuaikan untuk mencerminkan kurs yang berlaku yang terakhir diumumkan oleh Bank Indonesia untuk tahun berjalan. Laba atau rugi kurs yang terjadi dikreditkan atau dibebankan pada usaha tahun berjalan.

Pada tanggal 31 Desember 2005 dan 2004, kurs yang digunakan masing-masing sebesar Rp9.830 dan Rp9.290 untuk AS\$1, yang merupakan kurs rata-rata antara kurs beli dan kurs jual uang kertas dan/atau kurs transaksi, yang terakhir diumumkan oleh Bank Indonesia masing-masing pada tanggal 31 Desember 2005 dan 2004.

j. Pajak Penghasilan

Beban pajak kini disajikan berdasarkan taksiran penghasilan kena pajak tahun berjalan. Aktiva dan kewajiban pajak tangguhan diakui berdasarkan perbedaan temporer antara dasar pelaporan aktiva dan kewajiban menurut komersial dan pajak pada masing-masing tanggal pelaporan. Manfaat pajak masa yang akan datang, seperti akumulasi rugi fiskal yang belum digunakan, juga diakui sejauh manfaat pajak tersebut besar kemungkinan dapat direalisasi.

Aktiva dan kewajiban pajak tangguhan dihitung berdasarkan tarif pajak yang berlaku pada saat aktiva dipulihkan atau kewajiban dilunasi, berdasarkan tarif pajak (dan undang-undang perpajakan) yang telah berlaku secara efektif atau yang telah secara substantif berlaku pada tanggal neraca.

Koreksi terhadap kewajiban pajak dicatat pada saat Surat Ketetapan Pajak diterima atau pada saat keputusan atas keberatan ditetapkan, jika Perusahaan mengajukan keberatan.

k. Pelaporan Segmen

Perusahaan bergerak dalam usaha manufaktur berbagai jenis weldmesh yang memiliki risiko dan imbalan yang sama dan terutama beroperasi di satu lokasi geografis (Indonesia). Manajemen berkeyakinan tidak terdapat informasi segmen usaha dan geografis yang dapat diidentifikasi (segmen dilaporkan) sebagaimana dimaksud dalam PSAK No. 5.

I. Kewajiban Diestimasi atas Kesejahteraan Karyawan

Perusahaan mengakui kewajiban atas kesejahteraan karyawan yang tidak didanai sesuai dengan Undang-undang Ketenagakerjaan No. 13/2003 tertanggal 25 Maret 2003 ("Undang-undang"). Pada tanggal 1 Januari 2004, Perusahaan memutuskan untuk menerapkan lebih awal PSAK No. 24 (Revisi 2004), "Imbalan Kerja" secara retrospektif dan mengubah metode akuntansi sebelumnya atas imbalan kerja dengan metode yang diatur dalam standar ini. Berdasarkan PSAK No. 24 (Revisi 2004), biaya untuk imbalan kerja berdasarkan Undang-undang ditentukan dengan menggunakan metode penilaian aktuaria "Projected Unit Credit". Keuntungan dan kerugian aktuarial diakui sebagai pendapatan atau beban apabila akumulasi bersih dari keuntungan dan kerugian aktuarial yang belum diakui untuk setiap program pada akhir tahun pelaporan sebelumnya melebihi 10% dari jumlah kewajiban imbalan pasti pada tanggal tersebut. Keuntungan dan kerugian aktuarial tersebut diakui secara garis lurus selama rata-rata sisa masa kerja yang diprakirakan dari para karyawan. Selanjutnya, biaya jasa lalu yang timbul dari penerapan suatu program manfaat pasti atau perubahan-perubahan pada hutang imbalan kerja atas program yang sudah ada harus diamortisasi selama periode sampai manfaat tersebut menjadi hak karyawan.

The financial statements have been prepared on the historical cost basis of accounting, except for inventories which are stated at the lower of cost or net realizable value; and certain property, plant and equipment which are stated at revalued amounts.

The statements of cash flows present cash receipts and payments classified into operating, investing and financing activities. The cash flows from operating activities have been prepared under the direct method.

The reporting currency used in the financial statements is the Indonesian rupiah.

b. Cash Equivalents

Unrestricted time deposits with maturities of three months or less at the time of placement are considered as "Cash Equivalents".

The Company provides allowance for inventory obsolescence based on a review of the inventories at the end of the year.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

f. Property, Plant and Equipment (continued)

Land (including those not used in operations) are stated at cost and are not amortized.

The cost of maintenance and repairs is charged to operations as incurred; significant renewals and betterments are capitalized. When assets are retired or otherwise disposed of, their carrying values and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is credited or charged to current operations.

The Company reviews whether there is an indication of assets impairment at balance sheet date. If there is an indication of assets impairment, the Company estimates the recoverable amount of the assets. Impairment of assets is recognized as a charge to current operations.

g. Leases

Lease transactions are accounted for under the capital lease method when the required capitalization criteria under PSAK No. 30 are met. Otherwise, leases are accounted for under the operating lease method. Assets under capital lease (presented as part of Property, Plant and Equipment) are recorded based on the present value of the lease payments at the beginning of the lease term plus residual value (option price) to be paid at the end of the lease period.

Depreciation is computed using the straight-line method based on the estimated useful lives of the leased assets which are in line with the estimated useful lives of property, plant and equipment. Gain on sale-and-leaseback transactions is deferred and amortized using the straight-line method over the remaining useful lives of the leased assets.

h. Revenue and Expense Recognition

Revenue from sales is recognized when the products are delivered to the customers. Advances received from customers are recorded as "Advances from Customers". Expenses are recognized when incurred.

i. Foreign Currency Transactions and Balances

Transactions involving foreign currencies are recorded at the rates of exchange prevailing at the time the transactions are made. At balance sheet date, monetary assets and liabilities denominated in foreign currencies are adjusted to reflect the last prevailing rates of exchange for the year published by Bank Indonesia. The resulting gains or losses are credited or charged to operations of the current year.

For December 31, 2005 and 2004, the rates of exchange used were Rp9,830 to US\$1 and Rp9,290 to US\$1, respectively, computed by taking the average of the last buying and selling rates for bank notes and/or transaction exchange rates published by Bank Indonesia as of December 31, 2005 and 2004, respectively.

j. Income Tax

Current tax expense is provided based on the estimated taxable income for the year. Deferred tax assets and liabilities are recognized for temporary differences between the financial and the tax bases of assets and liabilities at each reporting date. Future tax benefits, such as the carry-forward of unused tax losses, are also recognized to the extent that realization of such benefits is probable.

Years Ended December 31, 2005 and 2004
(Expressed in Rupiah)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

j. Income Tax (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Amendments to tax obligations are recorded when an assessment is received or, if appealed against by the Company, when the result of the appeal is determined.

k. Segment Reporting

The Company is engaged in the manufacture of different types of weldmesh that the same terms of risks and returns and mainly operates in one geographical location (Indonesia). The management believes that there are no business and geographical segments that are identifiable (reportable segments) as defined under PSAK No. 5.

l. Estimated Liabilities for Employees' Benefits

The Company recognized an unfunded employee benefit liability in accordance with Labor Law No. 13/2003 dated March 25, 2003 ("the Law"). On January 1, 2004, the Company resolved to early adopt PSAK No. 24 (Revised 2004) – Employee Benefits, on a retrospective basis and changed its previous accounting method for employee benefits to the method required under this Standard. Under PSAK No. 24 (Revised 2004), the cost of providing employee benefit under the Law is determined using the projected unit credit actuarial valuation method. Actuarial gains and losses are recognized as income or expense when the net cumulative unrecognized actuarial gains and losses for each individual plan at the end of the previous reporting year exceeded 10% of the defined benefit obligation at that date. These gains or losses are recognized on a straight line basis over the expected average remaining working lives of the employees. Further, past-service costs arising from the introduction of a defined benefit plan or changes in the benefit payable of an existing plan are required to be amortized over the period until the benefits concerned become vested.

m. Basic Earnings per Share

Basic earnings per share is computed by dividing net income of the year by the weighted average number of shares outstanding during the year. The weighted average number of shares outstanding is 9,600,000 shares in 2005 and 2004.

n. Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Due to inherent uncertainty in making estimates, actual results reported in future periods may be based on amounts that differ from those estimates.

These financial statements are originally issued in Indonesian language.
